Portfolio

Profile

Associate Systems Developer and advanced Systems Engineering student with over 3 years of technical experience in web and mobile application development using a wide range of technologies. Trained in data analysis and AI, characterized by rapid learning and strong problem-solving skills. Expert in requirements gathering and agile methodologies to ensure high-quality software delivery.

Experience

Secretariat of Science and Technology, Apr 2023 - Present

Full-Stack Developer

- Development and support of an integrated system centralizing information for 100% of the organization's researchers, projects, and R&D groups using Node.js, Express, Prisma, and PostgreSQL.
- Integration of libraries (Prisma, React, Vite) to optimize performance and user experience.
- Design and maintenance of data models and UI screens, working alongside the Product Owner for functional requirements gathering.
- Testing and version control with Git/GitHub, ensuring code quality and scalability for every delivery.

Elepad (UTN Graduation Final Project), March 2025 – March 2026

Full-Stack Developer

- Development and implementation of a cross-platform mobile application (React Native, Expo, TypeScript) focused on older adults and successfully published on the Google Play Store.
- Integration of Google Gemini AI for the synthesis of memories and generation of narrative albums.
- Design of an efficient serverless backend architecture using Cloudflare Workers, Hono, and OpenAPI, integrated with Supabase for PostgreSQL database management, authentication, and storage.
- Implementation of CI/CD pipelines through GitHub Actions, automating build and deployment workflows.

Education

National Technological University (UTN), 2021 – Jul 2026 (Expected)

5th Year, Information Systems Engineering.

National Technological University (UTN), 2021 – 2025

University Systems Analyst Developer.

Josefina Contte Institute, 2014 – 2020

B2 Regular Intermediate English Course.

Skills

Frontend: React, JavaScript, TypeScript, HTML5, CSS3, Next.js, React Native, Angular, and Vite.

Backend & Data: Python (Django, Django REST Framework), API Architecture (REST), Node.js (Express), SQL (MySQL, PostgreSQL), Prisma ORM, Database Design (DER), Pandas, and NumPy.

DevOps & Infrastructure: Docker and Docker Compose, Kubernetes, Cloud Platforms (Azure, Render, Supabase), CI/CD Pipelines (GitHub Actions), Grafana, Prometheus.

Methodologies & Tools: Scrum (Agile Methodologies), TDD, Git and GitHub, Postman, Jira, Slack, Teams and Discord, VS Code, D2 and Mermaid (Diagrams as Code), Excel, Google Sheets, Word, and PowerPoint.

Languages: Spanish (Native), English (Intermediate).

Achievements

National Finalist, CUBESAT Competition, 2025

Design and development of a small-scale satellite (CubeSat) for data collection and analysis.

3rd Place, Latin American Innovation Rally, 2024

Social Impact category. Developed a technology solution during a 24-hour intensive competition.
